

# Operation Scrubs Nurse Survey

So, How Did the  
Nurses Feel About the  
Day?

Survey Comments

# Nurse Comments

- Far and above exceed my initial expectation. Looking forward to next year.
- Ten stars. Terrific seminar
- Very well organized event, with a little hiccup in the beginning due to issues with IT.
- As an old dog, I was actually excited that I was able to learn new things....made the whole day worthwhile. Loved the venue, food was exceptional for being catered (you would never know). Only negative was that some of the younger participants found it necessary to chat, which sometimes made it harder to hear the speaker, even with the audio system. Excellent day for me.

- Loved the location and content we will come again
- Great program!
- Very good and effective seminar
- I learnt a lot especially the CT of the brain
- I wish we had more time to look at GWTG and see her tips and tricks. I really enjoyed my day. Looking forward to next year!
- I felt a little seasick as the ship bobbed back and forth at the dock and the air felt stifled when it wasn't blowing. Maybe increase the air flow...?
- It was a wonderful event that showed dedication and appreciation for nurses. Very insightful stroke information and education provided. Great job Pam.
- Handouts in bigger font

- Some of the presentations had tables that were difficult to see in presentation and in the booklet. Having a PDF version on a flash drive would help. Thanks!
- Great topic and delivery, great venue, great time! Thank you so much Pam!
- Loved the scan reads and the information regarding pre-hospital care.
- Thank you!! We all had fun and learned tons!
- It was overall very enjoyable and I learned a lot more about caring for stroke patients. I truly appreciated the patients presentation. Very touching. Keep it up! Was not very interested in the data portion
- Thank you for the invitation. As a new Stroke Coordinator, this was very helpful.
- Excellent and unique venue with excellent food and excellent speakers. Learned new updates

- One of my favorite conferences. I loved the stroke survivor panel at the end. Very inspiring and motivating. Thank you Pam!
- Great venue and food options. More speaker variety/shorter lectures and color coded handouts would be appreciated.
- Would have liked to have the speakers talk at front of the screen at and not toward the mid section of the tables. I could not keep turning my head.
- This is a great symposium for neuroscience nurses. It's a combination of good learning and relaxing environment. Thank you Pam for the opportunity to be in this symposium.
- Hearing from the stroke survivors and seeing how far they have come is really rewarding. I work in the ICU so I only get to see them at their worst. Nice to see how well people can do after a stroke.
- Amazing cme

- It was very interesting the seminar was excellent. I will be back next year.
- Great! Please do more of other Neuro processes
- Excellent presentation on ct scan readings
- I thought the topics were great and the location, boat, and food were excellent. Please do this event again.
- I really enjoyed the seminar, I would've liked to see more speakers. It's hard to stay focused when one individual is reviewing the majority of the content. Having different speakers helps to switch things up. I've attended several seminars, symposiums, and conferences and this is the first time I've had the privilege of witnessing testimonies from stroke survivors. This was my favorite part of the seminar. In practice we see patients at their worst, it was refreshing to hear their stories.
- great event for nurses!

- I did not realize it was going to be so heavy in regards to “how-to’s” of data entry, etc. But as a nurse that is apart of the hyper acute stroke team, my gratitude for the work our stroke coordinator does grew enormously. I think it would be great to hear about other programs successes, helpful tips on how to make stroke programs better based on any sort of research, or input from programs across the country. I would love to hear about strategies that work or don’t work from other programs. Also loved the stroke survivor panel.
- Wonderful presentation and very organized. The speakers were knowledgeable and it was nice getting to listen to stroke survivors.
- Very enjoyable
- Loved the education
- My only constructive criticism would be to maybe have the data management presentation earlier in the day, because it was a little hard for me to focus on it after lunch. It could also be because I don't do anything with data management in my current role, so take that into consideration too. I think having the neuro anatomy/imaging in the morning was great because we're all more alert then.

- The presentations & topics makes a difference for knowing how to detect early signs & symptoms for treatment & recovery & avoidance of deficits.
- Great event! My favorite section was learning how to read and dissect CTs & MRIs
- Keep it up
- Great content
- I look forward to attending again, in the future
- Thank you so much for offering this education to stroke coordinators! It had information that I found to be valuable in helping me with some of the "technical" aspects of my job that I didn't quite have a handle on yet
- The program is great and I would recommend to others. As stated before I would like to see more about Joint Commission in general being educated on.

- Very informative and well organized
- Stroke Educator (OT) to speak more directly about her goals and standards that need to be met, rather than the speaking only to an audience of coordinators (unless appropriate). Overall, very nice presentation
- Great educational day. Gained so much. Loved the imaging slides/discussions. Highly recommended.
- Would love to see more neuroplasticity information.
